DETAILED ACTION

1. This office action is responsive to communication filed on October 30, 2007. Claims 1-19 are pending in the application and have been examined by the Examiner.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 24, 2007 has been entered.

Allowable Subject Matter

3. Claims 1-19 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Consider claim 1, the prior art of record teaches a folding type mobile communication terminal with an integrated camera, the terminal comprising:

a body having a lower main folder and an upper subfolder;
a hinge connection element configured to pivotally connect the lower main folder to the upper subfolder, wherein the camera is located on a first side of the hinge

connection element laterally opposite to an adjustment plate located on a second side of the hinge connection element; and

a display configured to reproduce an image created by the camera, wherein the camera is mounted on the body of the mobile communication terminal so that orientation of the camera can be manipulated.

However, the prior art of record does not teach or reasonably suggest the limitation that the camera and the adjustment plate are operably connected by a central shaft, a right shaft, a left shaft, an upper shaft, and a lower shaft, each shaft being axially disposed within the hinge connection element providing the camera with a first, second, and third degree of movement.

Claims 2-9 are allowed as depending from an allowed independent claim 1.

Consider claim 10, the prior art of record teaches every limitation with the exception that the prior art of record does not teach or reasonably suggest the limitation that the camera and the adjustment plate are operably connected by a central shaft, a right shaft, a left shaft, an upper shaft, and a lower shaft, each shaft being axially disposed within the hinge connection element providing the camera with a first, second, and third degree of movement.

Consider claim 11, the prior art of record teaches every limitation with the exception that the prior art of record does not teach or reasonably suggest the limitation

of a right shaft, a left shaft, an upper shaft, and a lower shaft axially disposed in the tubular hinge connection element wherein the right, left, upper and lower shafts are approximately symmetrically disposed around the central shaft and providing the camera with a first, second, and third degree of movement.

Claims 12-19 are allowed as depending from an allowed independent claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
